This tract is in the very heart of the city, bounded by street railroads and surrounded by the handsomest residences in Los Angeles, fronting on Main street, between Tenth and Twelfth.

Their rapid increase in value over the small amount of the subscription price is an assured fact.

Water, that great necessity, is not only conveyed by the city water mains through the entire extent of the 200 lots, but the district has also the advantage of the largest and best zanja in the city.

Six masts with electric lights nightly lighted on this tract almost turn night into day with their surpassing brilliancy.

Orange trees and vines of twenty years' bearing, nut and applied, the great advantage of a rural home with wonderful beauty. The extraordinary terms of sale place this splendid property within the reach of all. Payments are made in \$25 per month installments, without interest; and the price per lot, \$500, is one-half the price charged for surrounding lots.

Parties wishing to view the tract will be shown over every lot on application to the office.

Bargains Almost Incredulous.

It has been one continued wonder to the public and to high-priced merchants how the People's Store could keep its doors open for the length of time it has and sell goods at the low prices it does. We hear it on every side, "How can you sell goods at such low prices and exist?" The excuse proffered by those merchants who have long been distanced in the race of h legitimate merchandizing, and sunk out of sight in the quicksands of high prices, was that we had not come to stay; that we were trying to convert our goods into money at any price, defraud our creditors and enjoy our ill-gotten gains. That we should be successful is no wonder: We have followed out the

We allow no deception or misrepresentation, and we return to the dissatisfied their money in lieu of our goods. What other house does that? That our prices are very low is but natural. Our purchases run up in thousands where others are hundreds. We use dozens and gross where others use a single article, and quantity regulates the price. Again, we always have a large sack of coin awaiting investment in merchandise that can be purchased at 50 cents on the \$1 of their market quotations. This fact is well known to the largest commission merchants, and goods are forced on to us, whereas the loud crowing, loud blowing, and incessant tolling misnomers are obliged to beg for what they get and are only too glad to take them at prices their necessities compell them to accept. Thus it was that Mr. Newhall, knowing of this secret sack, came to us and offered the invoice of consigned goods to us at 50 cents on the \$1, which we purchased, placed in our store, and sell 25 per cent less than the first cost of the same AFTER MANY DAYS Work, in Assorting and am Prepared to Give placed in our store, and sell 25 per cent less than the first cost of the same goods to all our neighbors.
